Dewey-Burdock Class III & V Injection Wells

Dear Madame,

We are writing to ask you to REJECT the two Underground Injection Control (UIC) Draft Area Permits and one associated proposed aquifer exemption decision for the Dewey-Burdock uranium in-situ recovery (ISR) site located near Edgemont, South Dakota, under the authority of the Safe Drinking Water Act and UIC program regulations.

While we understand uranium is naturally occurring in our environment and that waste products generated from extraction, etc needs highly effective containment, we shudder to think the EPA would allow any risk of contamination of our finite water resources with said waste fluid injection. Even a slight risk of contamination to the aquifer at the Minnelusa Formation is too much of a risk.

WATER IS LIFE and its purity must be protected at all costs.

Thank you for placing my comments into the record opposing these permits to Powertech (USA) Inc..

Sincerely,

Ex. 6 Personal Privacy (PP)
